

Flu Mist (Influenza Vaccine Live, Intranasal) will NOT be available for the 2016-2017 flu season.

The CDC's Advisory Committee on Immunization Practices (ACIP) voted that live attenuated influenza vaccine (LAIV), also known as the "nasal spray" flu vaccine, should not be used during the 2016-2017 flu season. This ACIP vote is based on data showing poor or relatively lower effectiveness of LAIV from 2013 through 2016. The CDC continues to recommend annual flu vaccination for everyone 6 months and older.
